Description

The SMX1050SLT SmartPro 230V 1.05kVA 650W Line-Interactive Sine Wave UPS provides battery backup and

AC power protection against blackouts, brownouts, power surges and line noise that can damage electronics or destroy data. Ideal for backing up point-of-sale applications, VoIP systems and small business networks, the SMX1050SLT switches to battery mode in milliseconds to keep your connected equipment running long enough to save files and shut down safely with no data loss.

Featuring eight C13 outlets and a C14 inlet that accepts a user-supplied AC power cord, the SMX1050SLT has an internal battery that provides 20 minutes of support at half load and seven minutes at full load. Front-panel LEDs indicate line power, voltage regulation, load level and battery status. An alarm sounds to indicate power failure or overload.

Automatic voltage regulation (AVR) maintains selectable 220V, 230V or 240V nominal output over an input range of 174V-266V (220V), 182V-278V (230V) or 190V-290V (240V) without using battery power. EMI/RFI noise filtering improves your equipment's performance and prevents damage. A 350-joule surge suppression rating protects your equipment from harmful power surges. With Tripp Lite's downloadable PowerAlert® software, the SMX1050SLT enables safe unattended system shutdown and file saves in case of a prolonged power failure. Adding an optional network management card permits remote management of the UPS, including reboots and activity logs.
